

Should you lease or buy solar panels?

Homeowners do get to take advantage of net metering, so the solar panels still lower or eliminate their electric bill. Solar leases provide predictable monthly payments, increase access to solar, and have no maintenance costs for the homeowner.

Does a solar lease cover a roof penetration warranty?

As well as covering the costs of the solar panel system, most solar lease suppliers also cover a roof penetration warranty. In some parts of the US, the weather is notoriously unreliable, which means solar panels can generate more energy on some days compared to others.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

What is the difference between a solar lease and a PPA?

These two financing options are very similar. The critical difference is that with a solar lease, you'll have a fixed monthly payment, whereas with a solar PPA, you'll purchase the power generated by your system at a fixed price per kilowatt-hour (kWh). What does that mean for you?

Is it a good idea to get a solar lease?

Solar leases can save you money from day one as opposed to a car lease, which doesn't provide any savings. The monthly lease amount for solar energy systems increases annually due to a factor called the solar lease escalator, which is a percentage of the solar lease cost. Solar lease contracts typically last for 20 years.

What are the pros and cons of solar leasing?

As with any solar financing option, solar leasing comes with its share of pros and cons: The three main advantages of a solar lease are: Saving money on electricity: With a solar lease, you'll save on electricity costs throughout your agreement.
