

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

Will France increase its solar power capacity by 2023?

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

What is France's solar energy capacity in 2022?

In 2022, France's solar energy capacity amounted to around 17.4 gigawatts. This was the peak value within the period of consideration and an increase of around 14.9 percent when compared to the previous year. Get notified via email when this statistic is updated. How big is residential solar PV in France?

The average size of residential solar PV systems is estimated to be 3.24 kW moving to 2030. The technical potential for residential solar PV in France is estimated at 34,810 MW. The payback time for residential Solar PV in France is 25.1 years as of 2015.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2022, the PV energy capacity in France amounted to approximately 17 gigawatts, making France the fifth European country for cumulative PV capacity that year.

How much does solar cost in France?

A French law passed in 2023 will require parking lots larger than 50,000 square feet (4,600 m²) to build solar canopies covering half their area. This could result in installed capacity of 6.75-11.25 gigawatts, at a cost of \$8.7-14.6 billion. The insolation in France ranges from 3 sun hours/day in the north to 5 sun hours/day in the south.
