

How much does a 3KW Solar System cost?

A solar panel system with 3 kW of capacity typically costs around \$9,000-- or roughly \$6,300 after applying the federal investment tax credit, which can recoup up to 30% of your total upfront costs.

How long does a 3KW Solar System take to pay for itself?

Based on our estimated savings of \$700 per year, a 3kW solar panel system that costs you \$9,000 upfront would take roughly 12.8 years to pay for itself. However, if you were to apply the federal tax credit of 30% and lower your upfront costs to \$6,300, the same solar array could pay for itself in about nine years.

How many kWh can a 3KW Solar System produce?

For example, according to the Global Solar Atlas, a 3kW system could potentially produce roughly 12 kilowatt-hours (kWh) of solar power per day (about 4,300 kWh per year) near Minneapolis and St. Paul, Minnesota. Down south in sunny Albuquerque, New Mexico, however, a 3kW system could produce nearly 16 kWh daily (about 5,700 kWh per year).
