Are 450 watt solar panels a good choice?

In this section of our website there are all 450 Watt solar panels for sale that are currently available in our store. It's a great choice for commercial systems,though you can use them for your home as well. The key difference between home and business systems is their scope: commercial installations are much larger in size.

How many kWh does a 450 watt solar system produce?

For instance,a single home 450 watt solar panel in California will produce roughly 2.5 kWh per day. It's enough to run a stove for 1-3 hours or to keep a TV on for 24 hours. An American house needs around 30 kWh per day on average and around 900 kWh per month. A 5-6 kW solar system covers these needs.

Are bvm6612m 450W bifacial solar panels good?
