

For a 6 KW solar panel installation consisting of 20 panels, the weight of just the panels will be close to 800 pounds. Here we are basing our calculations on an average thin-film panel weighing 40 pounds.

The weight also varies based on the type of material used to make the solar panel, due in part to the manufacturing process. For example, a 365-watt monocrystalline solar panel could weigh 45 pounds whereas one ...
