

Does ageto use a microgrid controller?

Generac has worked with Ageto since 2021, incorporating their microgrid controllers into Generac's Battery Energy Storage Systems (BESS) solutions and generator sets. Ageto's microgrid controller helps enable users to coordinate, optimize, and monitor all components of their microgrid from one simple interface.

What is the ageto arc Microgrid controller?

The Ageto ARC microgrid controller is the brain for your microgrid system, seamlessly integrating, optimizing, and managing diverse energy resources. goal is to make renewable energy simple. Simple is beautiful. Simple is intuitive. Simple is fueled by innovation, experience and proven success.

Why do you need an arc Microgrid controller?

The microgrid controller you select matters. That's why we built ARC. The ARC microgrid controller coordinates all the elements of your microgrid into one elegant system -- optimizing both conventional and renewable energy resources, and giving you the monitoring and management tools you need to keep the lights on.

What is a microgrid controller?

Your microgrid controller is the brain for your microgrid-- the piece of technology that transforms a collection of disparate microgrid energy resources into a cohesive independent power grid.

What is ageto LCC?

The Ageto LCC is a flexible load control solution designed to extend battery life during grid outages. The Ageto RMC integrates seamlessly with the Ageto Renewable Controller (ARC), allowing for precise system metering for loads or energy sources. ARC has accumulated over one million hours of microgrid energy management.

How does arc monitor a microgrid?

ARC records data every second so you can monitor loads, solar estimates, energy production, and more for precision trending and troubleshooting. The ARC microgrid controller automatically sends email alerts when there's an alarm from any of your microgrid assets. ARC stores alarms and system events so you can view them anytime.

The ARC microgrid controller coordinates all the elements of your microgrid into one elegant system -- optimizing both conventional and renewable energy resources, and giving you the monitoring and management tools you need to keep the lights on. Reliable power. No more costly outages -- save thousands of dollars and your peace of mind

The ARC microgrid controller coordinates all the elements of your microgrid into one elegant system --

optimizing both conventional and renewable energy resources, and giving you the monitoring and management tools you need to ...

The microgrid controllers are designed to help enable users to coordinate, optimize and monitor all components of their microgrid from a single, simple interface. Generac has worked with Ageto since 2021, incorporating its microgrid controllers into its battery energy storage system (BESS) solutions and generator sets.

microgrid controller to get your power system running -- and keep it running. Ageto ARC is an equipment-agnostic, elegantly integrated microgrid controller that's as reliable and robust as it is simple to manage.

Ageto's microgrid controller enables users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Ageto's software solution combined with Generac's BESS and microgrid multi-asset systems provides site-level system integration and control as compared to only hardware.

The Ageto RMC integrates seamlessly with the Ageto Renewable Controller (ARC), allowing for precise system metering for loads or energy sources. Revenue-grade power meter with accompanying current transformers ready to install at any point in your microgrid; One-stop solution for wiring, commissioning, and troubleshooting support

Ageto's microgrid controller helps enable users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Combining Ageto's software solution with Generac's BESS and microgrid multi-asset systems provides site-level system integration and control versus hardware only.

The Ageto ARC Microgrid Controller is a robust, reliable and highly flexible control solution designed to amplify the value of your energy resources in three-phase behind-the-meter and off-grid microgrid installations. The ARC controller acts as the single interface for your entire system, providing autonomous system control and optimization ...

Ageto, known for its ARC microgrid controller, has developed technology designed to integrate, optimize, and manage distributed energy resources, including conventional resources, renewable energy sources, and ...

Ageto's microgrid controller helps enable users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Combining Ageto's software solution with Generac's BESS and microgrid ...

Ageto, known for its ARC microgrid controller, has developed technology designed to integrate, optimize, and manage distributed energy resources, including conventional resources, renewable energy sources, and electric vehicle (EV) chargers. The ARC microgrid controller provides a unified interface for monitoring all

components of a microgrid ...

The ARC microgrid controller coordinates all the elements of your microgrid into one elegant system -- optimizing both conventional and renewable energy resources, and giving you the monitoring and management tools you need to keep the lights on.

The Ageto ARC Microgrid Controller is a robust, reliable and highly flexible control solution designed to amplify the value of your energy-resources in three-phase behind-the-meter and off-grid microgrid installations. Our energy-resource agnostic controller acts as the single interface for your entire system, providing autonomous
