

What is a custom aluminum box?

A custom aluminum storage box is a container manufactured to meet your specific needs. This ensures you won't have wasted storage space from containers that are too big or need to cram items into containers that are too small.

Which alloys are used for custom aluminum boxes?

The most common alloys used for custom aluminum boxes are 6062, 7075, and 3003. You can always contact KDM support to discuss the best alloy for your project. Metal fabrication is the process of making metal pieces by cutting, bending, and shaping the metal.

What are the benefits of custom aluminum boxes?

Custom aluminum boxes offer several benefits due to the material they are made from. Aluminum is a lightweight material, so the boxes fabricated from it are easy to move, carry, and mount--making it a versatile solution for any project. Additionally, aluminum is recyclable, so manufacturing custom aluminum boxes is eco-friendly and affordable in the long run.

Is it eco-friendly to make custom aluminum boxes?

Manufacturing custom aluminum boxes is eco-friendly since aluminum is recyclable. You will be able to recycle or modify your box, easily giving it a second life. Aluminum is also highly weldable, bendable, and ductile, making it easy to machine and customize at any time.
