

About High yield Energy Technologies (HyET) Group HyET Group develops technologies that enables commercially viable large scale implementation of renewable and decentralized energy generation and distribution. HyET Group currently consists of two companies: HyET Hydrogen and HyET Solar. HyET Hydrogen develops technology to enable large scale ...

Fortescue Metals acquires High yield Energy Technologies on 2021-10-07 for an undisclosed amount. Search Crunchbase. Start Free Trial . Chrome Extension. Solutions. Products. ... Edit Overview Section. Acquired Organization: High yield Energy Technologies HyET group create technologies that enable commercially viable, large scale access to ...

The companies that form part of the HyET group create technologies that enable commercially viable, large scale access to decentral renewable energy sources. The primary objective of the HyET group is to develop a sustainable and ...

Companies of the HyET group provide technologies for low-cost, distributed power generation and commercially viable hydrogen production at high pressure HyET Hydrogen B.V. being now partly owned by Fortescue Future Industries, fully supports Fortescue's approach to Sustainability and will adhere to their core values in their daily operations.

The companies that form part of the HyET group create technologies that enable commercially viable, large scale access to decentral renewable energy sources. The primary objective of the HyET group is to develop a sustainable and profitable business based on the above objective.

HyET (High yield Energy Technologies) E-Trol is a fast growing energy technology start-up focusing on the development of low cost, high efficiency water electrolyzer systems for green hydrogen production. The two key technologies ...

2 May 2022. FFI and Teslin Participaties provide growth capital to Netherlands-based HyET Solar. The global green energy company FFI and the Dutch investment fund Teslin Participaties have provided growth capital to the Dutch company HyET Solar, a leader in flexible and lightweight solar PV technology which has the potential to accelerate the global energy transition.

HyET Hydrogen B.V. | 5.227 volgers op LinkedIn. Accelerating the hydrogen transition with our unique electrochemical hydrogen compression & purification technology! | HyET Hydrogen B.V. (High yield Energy Technologies) is a company founded by the late Erik Middelma. HyET Hydrogen is producing electrochemical hydrogen compressors, which are a significant step ...

Fortescue Future Industries (FFI), a wholly owned subsidiary of Australian-based iron ore giant Fortescue Metals Group, announced on Thursday it had purchased the majority share in High yield Energy Technologies (HyET) Group, which includes among its assets solar PV module manufacturing firm HyET Solar.

HyET Solar has integrated APCVD, PECVD process technology into a roll-to-roll production line, enabling the possibility of high volume and high yield. Circularity The Powerfoil is designed with circularity in mind, using sustainable materials and processes to ...

Anglo American Platinum announces its investment alongside Shell Technology Ventures (STV) in High-Yield Energy Technologies (HyET), a Dutch company that has developed electrochemical hydrogen compression (EHC) technology that will support ...

Anglo American Platinum announces its investment alongside Shell Technology Ventures in High-Yield Energy Technologies, a Dutch company that has developed electro-chemical hydrogen compression technology that will support the adoption of fuel cell electric vehicles. ... HyET's technology is a more cost-effective and reliable substitute for ...

Fortescue Metals's green energy unit has bought a 60% stake in Dutch-based renewable firm High yield Energy Technologies (HyET) Group in a bid to cut costs and boost green energy production. "HyET Hydrogen's technology will support FFI in reducing costs in other areas of the green hydrogen supply chain," said Julie Shuttleworth, chief ...

Australian based Fortescue Future Industries (FFI) has acquired a 60 per cent stake in Dutch based High yield Energy Technologies (HyET) Group and provided the majority share of financing for the expansion of HyET Solar's Dutch Solar PV factory.

Fortescue Metals's green energy unit has bought a 60% stake in Dutch-based renewable firm High yield Energy Technologies (HyET) Group in a bid to cut costs and boost green energy production. "HyET Hydrogen's technology will support ...

High-Yield Energy Technologies specializes in electrochemical hydrogen compression within the renewable energy sector. The company provides hydrogen compressors designed for various applications, including building heat and power, as well as transport and mobility. HyET Group's technology is noted for the ability to produce hydrogen at high ...
