

Who is eyedro green solutions?

Eyedro Green Solutions Inc. is a software and electronics design company making electricity usage easy to understand. We provide simple solutions for monitoring your electricity in real-time. Combined with the MyEyedro cloud service, Eyedro is an affordable, easy to install and scalable electricity monitor for your home and business.

Where can I buy eyedro products?

Join thousands of customers in 150 countries already using Eyedro to keep an eye on their electricity use. Eyedro products are sold through distributors, value-added resellers, and direct via Eyedro.com. Please contact us for more information ([contact@eyedro.com](mailto:contact@eyedro.com)).

How do I connect an Eyedro product?

To connect an Eyedro product, first, perform a test by plugging a laptop or computer into the same port intended for the product - if you can open a browser and navigate the web, no additional configuration is likely needed. Eyedro EYEFI devices connect via WiFi.

What information do I need for setting up Eyedro?

To set up Eyedro, we will require the following network information for each module: The static IP address, subnet mask, gateway IP address, DNS1 IP address, and DNS2 IP address. We will also require your MyEyedro username and the serial number of the module(s).

Does eyedro have directional sensing?

Eyedro EYEFI systems have directional sensing in the case where there is solar generation/net metering. If you are not using solar equipment and are seeing negative values, you can invert the sensors in the MyEyedro device settings.

How much data does an Eyedro device use?

An average Eyedro device consumes 3 - 5MB of data per day in a typical residential environment. The wireless power level is 3.2mW (5dBm) for products shipped outside of North America, and 63.1mW (18dBm) for products shipped within North America.
