

# Anti-theft window installation of solar panel bracket

What are anti theft solar panel mounting clips?

Our anti-theft solar panel mounting clips are designed to securely tether your solar panels, bolstering their protection against theft and harsh weather conditions. Specialised Design. Our unique anti theft clips provide secure installation for your panels, ensuring peace of mind. Quality Guaranteed.

How to protect solar panels from theft?

By placing additional measures on your home, you can keep your panels safe from theft. Without any doubt, physically securing the solar panel to your roof in a cage with special security screws is the best way of securing the panels. However, having a camera on them constantly alerting you if there's any motion around them will also go a long way.

Are anti-theft solar panels a good idea?

The addition of anti-theft solar mounting PV panel clips to solar panel installations is a game-changer for peace of mind for property owners and solar project managers. The assurance that the solar panels have an extra layer of protection against theft and tampering allows stakeholders to relax and feel secure.

How do you secure a rooftop solar panel?

Place sensor lights on your rooftop. Replace all screws with security fastener screws. Caging your solar panels in a welded steel frame. Securing the panel down with cables and padlocks. Make sure there's no easy access to the panels. Install cameras to monitor the panels. Pay a security company to protect your property. Use window or door sensors.

How many anti-theft clips should a solar panel have?

For a standard residential solar panel, it's advisable to use at least four anti-theft clips - one at each corner of the panel. In the case of larger, commercial-grade panels or areas with heightened security concerns, a greater number of clips may be needed to ensure a secure and tamper-proof setup.
