

Overview This document presents the exteriors and describes the functions, technical specifications, application scenarios, structure, components, and cable connections of the APM30H (Ver.D), TMC11H (Ver.D), IBBS200D (Ver.D), and IBBS200T (Ver.D).

The advanced power module with heat exchanger (APM30H) is used for Huawei wireless products outdoors. It is small and easy to transport. The APM30H supplies DC power to the distributed or separated macro base station in outdoor scenarios. It provides space for both the BBU and transmission equipment.

The procedures for installing the hardware of the APM30H involve installing the APM30H, installing the APM30H components, installing the APM30H cables, sealing the cable holes, powering on the APM30H, and checking the APM30H hardware installation. 6.1 Information Related to the APM30H Installation The information related to the APM30H ...
