

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

Who is Arkon energy?

Established in 2021, Arkon Energy initiated operations with a modest 5-megawatt facility in Australia. Since its inception, the company has experienced remarkable growth, now boasting over 130 megawatts of capacity and extending its reach into key regions such as the United States and Europe.

Does Benin have electricity?

Electricity consumption in the Republic of Benin is highly dependent on external supplies, with 90% of the country's electricity coming from Ghana (Okanla, 2014, as cited by Kwakwa, 2018). Benin is subject to power cuts and recurrent energy crises, according to Atchike et al. (2020).

Why is Benin importing more electricity from neighboring countries?

In recent decades, Benin has experienced several energy crises that have forced it to import more electricity from neighboring countries like Ivory Coast, Ghana, and Nigeria, via the West African Power Pool (WAPP), to meet demand for its population. The worst crisis occurred from 2007 to 2013.

How much biomass does Benin use?

It is worth noting that final energy consumption using biomass in Benin was 46.3%, or 49.3% that of Mali's final biomass energy consumption (4175.8 ktoe), and that of Burkina Faso's (3915.4 ktoe).

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.
