

Who uses Alterra liquefaction technology?

Alterra Energy licenses its thermochemical liquefaction technology to entities looking to recycle more challenging plastics or to develop more sustainable products. For more information: alterraenergy.com. Neste Corporation, Press Release, 4 January, 2021 at 3:00 p.m. (EET) Alterra's industrial-scale waste plastics liquefaction unit in Akron, Ohio.

Why are oil and natural gas production rising in Argentina?

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining output from conventional oil and natural gas fields.

Where is Alterra liquefaction plant located?

Why did Argentina's natural gas imports fall 47% in 2024?

Argentina's natural gas imports via pipeline fell by 47% in the first nine months of 2024 compared with the same period in 2023. The decline was largely because pipeline imports from Bolivia, which made up around half of Argentina's natural gas imports in 2023, ended in September 2024.

Why is Argentina reversing Vaca Muerta pipelines?

Meanwhile, Argentina is investing in infrastructure to expand the distribution of natural gas from the Vaca Muerta formation to northern Argentina, including reversing pipelines designed for imports from Bolivia in order to export natural gas to Brazil.

Should Argentina's Drillers rally around a liquefied natural gas project?

YPF has been developing a liquefied natural gas project of its own involving multiple FLNGs and, eventually, construction of an onshore plant. Even with various projects being analyzed, YPF's chief executive has said that Argentina's drillers should rally around one venture.

The ongoing joint technology development between Neste and Alterra Energy and the continued processing of mixed plastic feeds in the Akron facility have given Neste confidence that the Alterra Energy technology is among the winning solutions for the liquefaction of waste plastic material.

4 ???· Crude oil production in the Vaca Muerta shale formation in Argentina is about to hit 1 million barrels per day this decade. The forecast came recently from Rystad Energy, and on its ...
