

Who is Borri power systems?

Borri has been developing and building uninterruptible power systems since 1932 and is a global provider of power electronics systems and solutions for harsh industrial and demanding critical power requirements.

Who is Borri?

Borri is a global provider of single phase and three phase UPS systems for industrial and critical applications. | Borri is a global provider of power protection solutions for harsh industrial, demanding commercial and ICT applications with over eighty years of experience in developing, manufacturing, and supplying uninterruptable power systems.

Is Borri a Legrand company?

Borri is a brand of Legrand, a publicly traded company and a global specialist in electrical and digital infrastructures, offering high-value-added products and solutions for commercial, residential and industrial buildings.

What makes Borri unique?

Borri's R&D vast expertise in all facets of firmware, power electronics and mechanical design provides innovative solutions for tomorrow's problems in Industrial and Critical Power applications. The company prides itself on its first-class service and superior engineering disciplines.

How do Borri rectifiers work?

Borri rectifiers, contained in the PCM (Power & Control Module) work in parallel with the PV DC source to compensate, stabilize and take over the PV DC power supply to maintain hydrogen production. This ensures the electrolyser maintains the optimal operating V/I curve.

What is Borri Green conversion technology?

The series is also powered by Green Conversion Technology, providing high efficiency and #UPS components' life extension. Borri Green Conversion technology is based on a patented battery-inverter control, managing the system to enhance double conversion #efficiency and extend battery life.

Borri is a global provider of power protection solutions for harsh industrial, demanding commercial and ICT applications with over eighty years of experience in developing, manufacturing, and supplying uninterruptable power systems.
