

Is mainspring UL certified?

Mainspring intends to deliver a model that is UL certified to directly run both hydrogen and ammonia, along with all other gaseous fuels, next year. "Clean fuels are essential to decarbonizing the grid and supporting the rapid growth of solar and wind power.

What makes mainspring a good company?

The integration and cross-disciplinary nature of Mainspring's business requires intentionally seeking out others who bring different skills, perspectives, and priorities. Our culture of inclusion and respect extends beyond our team to interactions with our partners and customers.

Could a mainspring generator replace a diesel backup generator?

A Mainspring product running directly on 100% clean hydrogen or ammonia could replace a diesel backup generator with equal resilience at zero-carbon, while being available to also provide other benefits such as easy permitting, demand response, and wholesale market participation, since it has low emissions and can be permitted to run 24/7.

On Tuesday, Mainspring's vision garnered a vote of confidence from U.S. utility and renewables giant NextEra in the form of a \$150 million agreement with its business services arm NextEra Energy ...

The Latin America Energy Outlook, the International Energy Agency's first in-depth and comprehensive assessment of Latin America and the Caribbean, builds on decades of collaboration with partners support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides insights on the ways in which the ...

The U.S. Department of Energy Office of Manufacturing and Energy Supply Chains has selected Mainspring Energy, manufacturer of innovative, fuel-flexible, power generators, for an award of \$87 ...

The Mainspring Linear Generator delivers an unmatched level of flexibility for the transition ahead. It's local so you can site where power is needed, it's dispatchable so you can ramp up and down to complement renewables, and it's fuel-flexible so you can operate on the cleanest fuels available today and in the future.

Onsite power generation provider Mainspring Energy Inc. today announced that its customer Lineage (NASDAQ: LINE), the world's largest temperature-controlled warehouse REIT, has signed an agreement ...

4 ???· About Mainspring Energy, Inc. Mainspring seeks a new approach to generating clean, resilient, and affordable electricity. Through high-efficiency methods of converting fuel to ...

Mainspring Energy is a technology company focused on providing clean and reliable power solutions through

its innovative Mainspring Linear Generator. Founded with the vision of supporting a net-zero carbon grid, Mainspring aims to deliver local power generation that can adapt to various fuel types and operational needs.

The Mainspring Linear Generator provides data center owners and operators with rapid deployments of clean, reliable, and flexible on-site power. ... Obtaining carbon-free energy every hour, every day is challenging for data center operators who have committed to zero carbon 24x7x365. The dispatchability of the Mainspring Linear Generator and ...

Long-term power reliability is crucial as the constrained grid faces increasing demands and volatility. Join forward-thinking leaders in energy infrastructure to learn how an innovative power generation system powered by linear generators can help reduce electricity costs and sustainably increase power reliability for patient safety.

Lineage has pioneered the use of linear generators for onsite power independence, sustainability, and cost control, with multiple deployments at its facilities in California and several Northeast U.S. states to date. In late 2021 Lineage announced its first cold storage facility to produce 100% of its energy consumption on-site, using rooftop solar and ...

Mainspring's Linear Generator technology expands ABM's growing portfolio of turnkey commercial fleet EV Charging and Power Resiliency infrastructure solutions NEW YORK, Oct. 24, 2024 (GLOBE ...

The announcement follows Lineage's November 2021 deployment of two Mainspring Linear Generators in tandem with 3.3 MW of solar arrays to achieve its first cold-storage facility to produce 100% of ...

MENLO PARK, Calif., July 19, 2022 -- Mainspring Energy announced today that it has entered into a memorandum of understanding ("MOU") with leading U.S utility American Electric Power (AEP) to pilot Mainspring's linear generator technology in Oklahoma. The pilot project will provide important real-world system experience as AEP evaluates a ...

MENLO PARK, Calif., March 9, 2021 /PRNewswire/ -- - NEWS SUMMARY - Mainspring Energy, Inc. launches the Mainspring Linear Generator, a new low-cost, fully dispatchable, and fuel-flexible power generation technology for commercial and industrial buildings, utilities, and microgrids. Mainspring enters into a \$150 million unit purchase and project finance agreement ...

Mainspring Energy's new linear generator uses a low-temperature reaction of air and fuel to drive magnets through copper coils to efficiently produce electricity with near-zero NOx emissions. ...

Mainspring Energy has surprised me in every way possible. The culture is amazing and as we keep growing, I see there's something new to learn every day. All executives and managers are open minded and non egotistical which is great for such a young company.
