

Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Our organization was founded in 2019 and in a short period of time has become one of the industry leaders.

Armenian solar panel installers - showing companies in Armenia that undertake solar panel installation, including rooftop and standalone solar systems. 19 installers based in Armenia are listed below.

Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Our organization was founded in 2019 and in a short period of ...

Optimum Energy Armenia creates value for clients by successfully harnessing the expertise of highly skilled multi-disciplinary engineering team in design, delivery and operation of high ...

SolARM presents its solutions in the field of solar energy, the goal is to develop the clean and renewable energy sector in Armenia, to ensure energy security, to use the great potential of Armenia's solar energy.

Solar power is the key to a clean energy future. Every day, the sun gives off far more energy than we need to power everything on earth. That's why we're investing heavily in solar plants and why we are now offering solar kits to our customers in Armenia, Georgia and Russia.

Optimum Energy Armenia creates value for clients by successfully harnessing the expertise of highly skilled multi-disciplinary engineering team in design, delivery and operation of high quality sustainable energy solutions locally and internationally.

Armenian solar panel installers - showing companies in Armenia that undertake solar panel installation, including rooftop and standalone solar systems. 19 installers based in Armenia are ...

Armenia has a great potential for solar energy (the average annual value of solar energy flow on 1 m<sup>2</sup> horizontal surface is 1720 kWh/m<sup>2</sup>, and a quarter of the territory of the republic is endowed with solar energy resources with an annual intensity of 1850 kWh/m<sup>2</sup>). Technology today allows us to capture and store solar energy, reducing energy ...
