

What is solar energy in Armenia?

Solar energy in Armenia is an important source of renewable energy, and its technologies are broadly characterized as active solar or passive solar, depending on how they capture and distribute solar energy or convert it into solar power.

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

Is Solara a green energy company in Armenia?

THIS IS NOW! Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Why Choose Solara? There is a great potential for solar energy in Armenia.

Who makes solar panels in Armenia?

Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel. In Solaron Company merged a team of highly qualified professionals with many years of experience in the business organization from scratch.

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

The use of solar energy in Armenia is gradually increasing. [2] In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor.

Optimum Energy Armenia creates value for clients by successfully harnessing the expertise of highly skilled multi-disciplinary engineering team in design, delivery and operation of high quality sustainable energy

solutions locally and internationally.

Solar energy in Armenia is an important source of renewable energy, and its technologies are broadly characterized as active solar or passive solar, depending on how they capture and distribute solar energy or convert it into solar power.

Optimum Energy Armenia creates value for clients by successfully harnessing the expertise of highly skilled multi-disciplinary engineering team in design, delivery and operation of high ...

Solar energy in Armenia. Discover how solar panels can save you money and save the environment. 1. Advantages of solar energy for households in Armenia. Solar energy in Armenia has started to develop very quickly in the last 15 years.

Homeowners from every region of Armenia have placed their trust in Solaron and confidently installed solar power stations, getting the remarkable benefits of renewable solar energy. As a homeowner, you can count on Solaron's personalized approach, guiding you through every step of the solar installation process, making it easy and hassle-free.

Armenia has a great potential for solar energy (the average annual value of solar energy flow on 1 m² horizontal surface is 1720 kWh/m², and a quarter of the territory of the republic is endowed with solar energy resources with an annual intensity of 1850 kWh/m²).

OverviewPotentialPhotovoltaicsThermal solarObstaclesSee alsoExternal linksSolar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power. The use of solar energy in Armenia is gradually increasing. In 2019, the European Union announced plans to assist Armenia towards developing its so...
