

Assembly of movable bracket for solar street light

What components are used in a solar street light system?

In most typical solar street light systems, the following components are used: the solar panel assembly, which is made up of the solar panel, mounting bracket, and hardware.

How to install solar panels & brackets?

Assembly of solar panels and brackets: Align the installation holes of the solar panels and brackets and tighten the screws. Pre-assembly of batteries: Place the batteries in the battery box, install the sealing ring, and thread the battery wires from the top cover wire outlet. Cover the top cover, align it with the holes, and tighten the screws.

How is a solar panel mounted to a pole?

To mount a solar panel to a pole, you need to install a solar panel mounting bracket assembly on the solar panel. Using an all aluminum bracket design with stainless steel hardware ensures that the solar panel assembly will stand up to the test of time, especially in harsh environments prone to rust and degradation.

Are solar street lights maintenance-free?

Solar street lights are designed to be essentially maintenance-free. However, in certain regions with extreme conditions, some level of maintenance is required to ensure the proper function of the lights. These regions are typically where there is a risk of dust, snow, or ice covering the solar panels and thus reducing the power of the lights.

How do I choose the best solar street lights?

Selecting the right site is critical for the performance of solar street lights. Factors to consider include: Sunlight Exposure: Ensure the location receives ample sunlight. Obstructions: Avoid areas with trees or buildings that may block sunlight. Safety: Choose a site that minimizes the risk of vandalism or damage. Lighting Requirements

How long do solar street lights last?

Use clean water to clean the solar panel from the top to the bottom with soft cleaning cloth. Every 5-7 Years: Replace the solar street light batteries if the voltages drop below normal levels. The battery has an expected life of 5-7 years. Congratulations, you've just installed your solar light!
