

Are wind and solar projects competitive in Venezuela?

In general, experts warn that the existing Venezuelan regulatory framework makes wind and solar projects not competitive and this creates additional risks for the development of such energy potential. The severity of all such factors evidence the difficulties to develop a sustainable energy sector in Venezuela.

Does Venezuela need an energy transition?

It is unmistakable that Venezuela needs an energy transition to reach the goals of sustainability and poverty reduction. Based on the current national reality, the recommendations to improve the Venezuelan energy sector will be presented from two different perspectives.

Does Venezuela have a micro-hydro energy mix?

The study evaluated the energy provided by micro- or mini-hydro, wind, PV, biomass or hybrid energy in some Latin American countries in 2012 and found that unlike the other nations evaluated, there were no reports of this kind of energies in the Venezuelan energy mix for 2012.

Does Venezuela have a natural gas market?

Venezuela's energy sector has lost much of its capacity to collect and use natural gas, preferring instead to burn it off. Venezuela's government regulates natural gas prices, and concerns exist about the pricing structure and regulations for this market.

Does Venezuela have an energy crisis?

Some are successful in their attempt to optimize their energy resources while others are not. This is the case of Venezuela, which faces a contradictory energy performance. Despite its substantial available renewable and non-renewable energy resources, it presents a severe energy crisis.

Is the Venezuelan wind potential a high risk?

The Venezuelan wind potential has been studied also by González-Longatt et al. . In this research, the authors identified the lack of information related to the Venezuelan wind resources as a high risk for the development of renewable projects and their commercial exploitation.
