Hong Kong is officially known as the Hong Kong Special Administrative Region of the People's Republic of China (HKSAR). It is a special administrative region within China. Approximately 7.5 million people live on the 1,104-kilometer island, making it one of the world's most densely populated areas.

Atlas Copco has launched ZenergiZe, a new range of lithium-ion energy storage systems that can be used as a standalone solution or combined with generators to create a hybrid power solution. ZenergiZe delivers zero CO2 emissions, zero noise, and have virtually zero maintenance needs, enabling operators to minimize environmental impact while ...

The coauthors find that while areas of resilience remain, an authoritarian turn in China under Xi Jinping has significantly eroded Hong Kong's "high degree of autonomy" that was supposed to be maintained until 2047. In response, the U.S. government should reevaluate its current approach to Hong Kong and consider productive policy ...

The analysis of energy autonomy has often been extended beyond technical and economic factors to include an analysis of social feasibility. It has also been understood as a direction that leads toward creating greater self-sufficiency rather than a strict requirement that assumes total self-sufficiency [5].The vast majority of energy autonomy research has been ...
