

What is the Global Solar Atlas?

The Global Solar Atlas is an open data initiative that makes available both modeled and measured solar radiation and meteorological data. Modeled solar and meteorological data are available for all land areas between 60°N to 45°S. Detailed information is provided in the Technical report.

Is solar energy efficient in Macao?

However, in the view of Macao-based scholar Wai Ming To, interviewed later in this special report, "Macao is a small city and has many high-rise buildings. Thus, solar energy is not efficient due to the shadowing effect of adjacent buildings and the small ratio of rooftop area to total floor area.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated.

How big are Macao's skyscrapers?

The scientist sees lots of potential in the city's skyscrapers. The total rooftop area of all buildings in Macao is about 5.3 square kilometres, or about 16 per cent of the city's total area.

× Calculation of energy output of PV station. Calculation of energy output of PV station - is a tool for the calculation of the electrical energy output of the projected PV station, and it also estimates total solar radiation coming to any orientated and tracking surfaces. Tilt of solar panel is the angle of the solar panel to the horizontal surface.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.
