

What is aeromine technologies?

Aeromine Technologies explains itself as "understanding the untapped potential of wind energy and limitations of existing rooftop energy options to capture it, Aeromine's founders envisioned a better solution that would be much more productive.

What is aeromine technologies' motionless wind-harvesting system?

BASF is currently testing Aeromine Technologies' patented motionless wind-harvesting system. From pv magazine USA A new bladeless wind energy unit, patented by Aeromine Technologies, is tackling the challenge of competing with rooftop solar as a local source of clean energy that can be integrated with the built environment.

Does aeromine work with rooftop solar?

Designed to work seamlessly with a building's existing electrical system, the combination of Aeromine's wind solution with rooftop solar can generate up to 100 percent of a building's onsite energy needs, while minimizing the need for energy storage. How does Aeromine's system differ from previous wind energy products?

Why did aeromine get a series A funding?

Aeromine Technologies secured Series A funding for scaling its innovative design. From pv magazine USA A new bladeless wind energy unit, patented by Aeromine Technologies, has secured \$9 million in Series A funding to accelerate the roll-out of its innovative technology.

Does aeromine make noise?

"Aeromine Technologies' patented motionless wind harvesting system generates up to 50 percent more energy at the same cost as rooftop solar PV," says the company. Standing out with its motionless, Aeromine is very respectful to nature -- it does not make noise and does not harm or kill birds.

Is aeromine a game-changer for commercial property owners?

When integrated with rooftop solar, Aeromine's wind solution can generate up to 100 percent of a building's onsite energy needs. This energy solution could be a game-changer for commercial property owners looking to fulfill the rising demand for on-site renewable energy.

A new bladeless wind energy unit, patented by Aeromine Technologies, is tackling the challenge of competing with rooftop solar as a local source of clean energy that can be integrated with the...

A new bladeless wind energy unit, patented by Aeromine Technologies, is tackling the challenge of competing with rooftop solar as a local source of clean energy that can be integrated with the built environment. The ...

Aeromine complements solar as wind energy is often produced at different time of day/year than solar. Wind is a highly effective renewable energy source resulting in high energy output per sqm rooftop. Aeromine's Innovative simplicity, ...
