

Who are solar installers?

Our core business activity is installing solar systems for residential, commercial and government organisations, as well as the distribution of solar and energy efficiency products to dozens of companies around the country. We have installed over 60,000 solar systems within group, and are the leading rooftop solar installer in Australia by volume.

Is Suntech Australia a good company to buy solar panels?

Suntech Australia emerges as a prolific entity in the solar panel industry, diligently crafting tier 1 solar panels, which are not only emblematic of superior quality but also come with a robust 25-year performance warranty and an impressive 12-year product warranty.

Is solar power a major contributor to electricity supply in Australia?

Solar power is a major contributor to electricity supply in Australia. As of December 2023, Australia's over 3.69 million solar PV installations had a combined capacity of 34.2 GW photovoltaic (PV) solar power.

Does Australia have rooftop solar?

At the end of 2018 Australia had just over 8 GW of rooftop solar. Even though Australia had a world-leading solar uptake, the study found the country was using less than 5% of its potential capacity for rooftop solar as of June 2019.

How resilient is Australia's small-scale solar & battery energy storage?

Australia's small-scale solar and battery energy storage has shown resilience against challenges, contributing jobs and the country's decarbonisation, as reported by Nikhil Jayaraj, the Managing Director of Regen Power.

How can Australia make solar energy more affordable?

Australia's government has strategically implemented various incentives and subsidies, such as the Small-scale Renewable Energy Scheme (SRES) and the Large-scale Renewable Energy Target (LRET), to make solar installations more accessible and financially viable for its citizens.
