

Progress at all five of the large solar photovoltaic concessions first launched in 2019 is an indication that Tunisia's renewable power sector may be moving forward despite extremely difficult political conditions.

Tunisia takes a significant step towards renewable energy with the inauguration of its first 1 MW photovoltaic solar power plant in Djerba. The project, costing 3 million dinars, ...

Tunisia's ambitious plan to increase renewable energy production is geared toward reducing its overreliance on imported gas for its power generation that threatens its energy security. The Kairouan Solar Project will be the first milestone to achieve the government's plan and will pave the way for further private investments in the sector.

Tunisia takes a significant step towards renewable energy with the inauguration of its first 1 MW photovoltaic solar power plant in Djerba. The project, costing 3 million dinars, is part of the national strategy to achieve 35% electricity production from renewables by 2035, contributing to reduced greenhouse gas emissions and improved energy ...

However, questions persist about who ultimately benefits from scaling up renewable energy in Tunisia. ... Tunisia's first large-scale solar initiative, significantly boosts the country's renewable energy capacity by providing 100 MW of solar power to the national grid. This initiative, part of Tunisia's broader goal to generate 35% of its ...

6 ???&#0183; Africa Intelligence has learned that Norwegian firm Scatec Solar has thrown in the towel on two of three solar photovoltaic power generation projects in Tunisia's Tataouine, Tozeur and Sidi Bouzid that it was awarded at the end of 2019.

Two new solar photovoltaic (PV) plants are set to be constructed in Tunisia, helping the country reduce its reliance on fossil fuels. The European Bank for Reconstruction and Development (EBRD) and Proparco, a French development agency, will provide EUR25 million (\$27.31 million) funding for the construction of two 60-megawatt (MW) solar power ...

Solar Energy in Tunisia. Tunisia has good renewable energy potential, especially solar and wind, which the government is trying to tap to ensure a safe energy future. The country has very good solar radiation potential which ranges from 1800 kWh/m&#178; per year in the North to 2600kWh/m&#178; per year in the South.

Two agreements have been signed at Kasbah Palace between the Tunisian government and Norwegian and Japanese renewable energy companies, &quot;Scatec&quot; and &quot;Aelous,&quot; to construct solar power plants in Sidi Bouzid and Tozeur.
