

Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PhotoVoltaic (PV) connections that will allow solar energy to be fed into the national electrical grid.

Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PV connections. The Ministry of Energy and Business is currently hosting a three-day Procurement Design Workshop with key stakeholders to discuss and make critical decisions with regard to ...

The Fair Trading Commission (FTC) has developed a framework for a four-year energy storage pilot project that could see qualified applicants receiving an energy storage tariff (EST) for up to ten years and the data used to inform the design of future energy storage programmes a summary of its EST decision, the FTC explained that there were ...

BRIDGETOWN, Barbados - Barbados" government has agreed to a mechanism allowing for competitive procurement for the storage of solar batteries and would soon move to amend the existing Utilities Regulation Act, Minister of Energy and Business, Lisa Cummins, has said.

One of the main outcomes is the announcement that Barbados will soon launch procurement process to acquire Battery Energy Storage Systems (BESS) which are vitally needed to support the grid and allow the many stalled solar photo voltaic (PV) systems to proceed.

The Fair Trading Commission (the Commission) and the Chief Electrical Officer have approved the Barbados Light & Power Company Limited"s (BLPC"s) Interconnection Requirements for Battery Energy Storage Systems (BESS) at Voltages 24.9 kV and below.

Barbados is soon to launch its first project for the installation of Battery Energy Storage System. This will support the electricity grid and will allow the stalled solar photo voltaic (PV) systems to proceed.

As Barbados pursues its ambitious 2030-2035 carbon neutrality target, the question of energy storage looms large. How can we bank the power generated from renewable sources like solar and wind when the sun isn"t shining and the breezes falter?

Barbados has reached the maximum capacity of the electric grid and the Barbados Light and Power Company has been advising that it is unable to connect homeowners and residential PV systems to the grid without the addition of storage.

BRIDGETOWN, Barbados - Barbados" government has agreed to a mechanism allowing for competitive procurement for the storage of solar batteries and would soon move to amend the existing Utilities Regulation
