

What is Stat-X®; fire suppression?

Stat-X®; highly-advanced condensed aerosol fire suppression for energy storage systems (ESS) and battery energy storage systems (BESS) applications.

How does Fike protect lithium ion batteries and energy storage systems?

Learn how Fike protects lithium ion batteries and energy storage systems from devastating fires through the use of gas detection, water mist and chemical agents.

Are lithium-ion batteries a fire suppression solution?

Lithium-ion battery technology has become a standard solution in this application due to its technical performance. However, its unique fire hazard is a concern in the industry, increasing the need for dedicated lithium-ion battery fire suppression solutions.

Does Stat-X extinguish a lithium ion battery?

The Stat-X aerosol extinguishing product was tested for efficacy in suppressing Li-ion battery fires. It was found that the Stat-X agent successfully extinguished single and double cell battery fires. This testing was conducted in parallel with a large battery fire testing program.

Why are Li-ion batteries a fire suppression agent?

Li-Ion battery cells are densely stored in their packs making it hard for a fire suppression agent to reach the fire. The production of oxygen during electrolyte decomposition supports the chemical processes that occur during a fire.

Can a battery energy storage system control electrical fires?

However, these systems may be used in the computer or control rooms of an ESS to control any electrical fires. Thermal runaway in lithium batteries results in an uncontrollable rise in temperature and propagation of extreme fire hazards within a battery energy storage system (BESS).

Due to the high risks and costs associated with fire and explosion tests, simulated investigations of fire characteristics and suppression performance in energy storage systems are crucial. ...

Fire Suppression for Energy Storage Systems. Stat-X condensed aerosol technology, favored for Energy Storage Systems, offers versatile fire protection with compact, customizable units. Energy Storage Systems (ESS) ...

2. Aerosol-Based Fire Suppression System The L3 Series features an integrated aerosol-based fire suppression system at the battery module and cabinet (for L3 HVR) level. In the rare event ...

FireBlock Lithium is a specialized fire suppression solution designed to effectively combat fires caused by lithium-ion batteries, particularly in electric vehicles (EVs), electronic devices, and energy storage systems. Lithium-ion battery fires pose ...

International Fire Code (IFC): The IFC outlines provisions related to the storage, handling, and use of hazardous materials, including those found in battery storage systems. UL 9540: ...

Fire risks in battery energy storage systems. Batteries serve a single purpose: to store energy. The larger the battery, the more energy is stored. So when a cell in the battery fails or ...

Fire protection for Li-ion battery energy storage systems. Our energy infrastructure is undergoing a radical transformation. An influx of excess energy from renewable sources is causing ...

Stat-X can reduce oxygen in an enclosed environment during a battery fire. Our DNV-GL FA test for O₂ levels that shows 18% and no drop. Due to the deep-seated nature of a stacked battery fire, the Stat-X extinguisher removed heat ...

HI-FOG is an effective solution for Li-ion battery fire suppression, proven in full-scale tests to ensure the fire safety of your battery energy storage system. ... Marioff HI-FOG ® water mist ...

Learn more about protecting your renewable energy such as energy storage systems (ESS) and battery energy storage systems (BESS). Search for: Distributor Portal; Contact; ... The Stat-X Advantage for Fire ...

Etica Battery is a Taiwanese manufacturer that has installed over 283 MWh of BESS using its proprietary immersion cooling technology. AGI is an American distribution and repair company with over 20 years of experience.

We have a small size of fire extinguisher that can fill with aerosol compounds between 30 to 3000 grams. For the lithium batteries, 30 grams of aerosol extinguisher is suggested to be installed ...

Fire Suppression Systems for ESS. FirePro technology has successfully proven its efficiency and effectiveness in suppressing Li-Ion battery fires in more than 100 tests carried out over the past 7 years by accredited laboratories and ...

The device adopts an integrated, miniaturized design and modular assembly, Especially suitable for fire protection in scenarios such as power distribution cabinets, charging stations, communication base stations, data cabinets, ...

We have years of experience in fire protecting battery energy storage systems. Marioff HI-FOG ® water

mist fire suppression system has been proven in full-scale fire tests with various battery manufacturers and research programs. ...

In addition to controlling the automated extinguishing system, the fire protection system triggers all other necessary control functions. Extinguishing Sinorix N2 extinguishing system The Sinorix ...
