

The Agency for the Cooperation of Energy Regulators (ACER) published an in-depth report on the Gas Storage Regulation [44], and GIE AGSI + TP was one of their main sources of information for providing key storage indicators per country.

GIE LNG Map; GIE Small Scale LNG Map; GIE Storage Map; System Capacity Map; Order maps; Videos; Energy Transparency. AGSI; ALSI; GSE Transparency Template; GLE Transparency Template; Databases. LNG Investment Database; LNG New Services Inventory; LNG List of Services; LNG Database; Storage Database; REMIT for LNG & Storage; GIE as IIP; Maps ...

3 ???&#0183; Storage data RAG Energy Storage is committed to complete transparency, and therefore posts the current storage level, and the quantities recently injected into and withdrawn from RAG owned facilities on its site.

The Storage Database is the base of the Storage Map. It shows the operational data such as working gas volume, injection and withdrawal capacities of storage facilities as well as the under construction and planned storage sites.

AGSI delivers online daily data representing approximately 76 BCM, i.e. 85 % of EU technical storage capacity. It publishes for 31 storage operators in 15 member states, volume in stock as well as the daily injection and withdrawal.

MSs have a storage capacity larger than their national gas consumption (Austria and Latvia), and are used at regional level (e.g. serve Southern Germany and the Baltics, respectively). Gas storage supplies 25-30% of the gas consumed during winter.

It shows the operational data such as working gas volume, injection and withdrawal capacities of storage facilities as well as the under construction and planned storage sites. The database is available in an open format and includes also details on the operators and facilities.
