

We are building the largest network of interconnected distributed energy resources in order to create the first granular intelligent grid "layer 2". This decentralised grid sits on top of the existing grid and connects distributed energy sources using blockchain technology.

For every 1kWh of energy you generate, you could earn 10p worth of Rowan Rewards (based on a Standard 5kWp Package), which you can redeem in pounds and pence to spend as you like. Once you have earned your Rowan Rewards, they can be redeemed into your PayPal account to spend as you want.

Rowan Energy is building the largest network of interconnected decentralised energy assets in the world. All of these assets are linked together by the custom-built Rowan Blockchain. Decentralised energy sources are added to the network by connecting them to our blockchain through our SmartMiner device.
