

Can I install solar panels myself in Belgium?

There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately.

How much subsidy can I get for solar panels in Flanders?

Currently the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is EUR750. In 2024 the maximum subsidy will decrease to EUR375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium?

Should you install a green certificate in 2024?

For larger installations (>36 kWp), the price of green certificates has not fallen as much as for private customers, which is why the rate at which CVs are granted will fall by more than 50% from February 2024! It therefore makes sense to install a system of this power quickly, so as to benefit from a CV rate that is still high today.
