

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

How much electricity does Benin need?

Benin belongs to several institutions like West Africa (WA), the African Union (AU), the World Trade Organization (WTO), ECOWAS, and WAEMU, and has a total installed energy capacity at 349 MW, with estimated electricity needs at 600 MW, given rapidly growing electricity demand, according to the West African Development Bank (BOAD, 2019).

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

How much biomass does Benin use?

It is worth noting that final energy consumption using biomass in Benin was 46.3%, or 49.3% that of Mali's final biomass energy consumption (4175.8 ktoe), and that of Burkina Faso's (3915.4 ktoe).

What can Benin do with waste?

Furthermore, Benin is a cotton exporter belonging to the Economic Community of West African States (ECOWAS), and cotton production waste could be used to produce gas and electricity, helping Benin move towards energy self-sufficiency. Likewise, household waste can be converted into energy, and is an ideal raw material for biogas production.

Through its subsidiaries, Swift Energy is principally involved in the provision of industrial automation and power system focusing on process control, explosion proof solar photovoltaic systems (ex solar PV), power distribution and other systems.
