Cavendish House, 2 Cavendish Road, Lower Floor, City ...

European options specify that a trader can only choose to exercise (or not) his option on the date of expiration. Bermudan options allow a trader to exercise his option on any of several specified dates before the option expires; thus, Bermudan options are sort of a middle ground between American and European options.

Energy storage is one method to balance our energy system, which is why Bermuda Electric Light Company Limited (BELCO) installed the Nolan Smith Battery Energy Storage System (BESS). The BESS provides ...

Developing new energy options requires a new framework of policy, legislation, and regulation. The current framework, developed when liquid fossil fuels were the only viable option, lacks the flexibility to integrate new options. The updated framework must also ensure

Yesterday, energy storage company Saft said it delivered and installed a turnkey Energy Storage System to Bermuda Electric Light Company (BELCO). The system provides up to 10 MW power for spinning reserves and frequency response to maintain grid stability and has a storage capacity of 5.5MWh, said the company.

Bermuda's electrical grid ensures efficient power distribution with high accessibility and quick restoration post-disasters, but it faces challenges with high costs and investment needs for renewable energy solutions.

Bermuda has three tranches of generator: for baseload, for intermediate power and for peaking power. Those intermediate generators are the most affected by reducing spinning reserve. Savings from the energy storage system are 85% fuel driven and 15% maintenance driven, according to BELCO's Stephanie Simons.

The Integrated Resource Plan, the Regulatory Authority's roadmap for Bermuda's future power supply, targets 85 per cent of electricity coming from renewable sources by 2035. Whether that lofty goal can be achieved will depend to some extent on private homeowners investing in solar photovoltaic systems.
