We are building an emergency power station in Iceland for a major client, where the containers house all the necessary equipment. The air grilles are equipped with motorized panel valves that automatically open when the engines start.

We design and manufacture 400Hz battery powered electric and diesel ground power units with 60 to 180 kVA power. Our GPUs are reliable, precise, innovative and easy to use and service. Every machine is equipped with a user-friendly electronic panel to easily manage:

Bertoli Power Units is spread over two specialised and interconnected production centres, in the province of Parma, which deal with: Project development, structural manufacture and production of control panels Assembly, control and finish of the
