

Technology group Wärtsilä, will supply the Caribbean island of Curaçao with a 25 MW/25 MWh battery energy storage system (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

Technology group Wärtsilä; will supply the Caribbean island of Curacao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

Technology group Wärtsilä; will supply the Caribbean island of Curaçao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

The order was placed by Aqualectra, Curacao's government owned utilities company, and will be booked by Wärtsilä; in Q2, 2024. The BESS and the GEMS Digital Energy Platform will provide grid stability and reliability, reduce unserved energy and help mitigate the ...

Finnish energy storage equipment integrator Wartsila has announced that it will supply a 25-MW/25-MWh battery energy storage system (BESS) to Dutch Curaçao utility Aqualectra, a utility owned by the government of Curaçao. The company has placed an order with Wartsila in the second quarter of this year.

Technology group Wärtsilä; will supply the Caribbean island of Curaçao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

The BESS will enable Aqualectra to add more renewables to the power system, help smooth their intermittent nature and provide grid stability. According to Aqualectra's 2022 annual report, the last one available on its website, wind and solar accounted for more than 32% of Curacao's electricity demand that year.

The BESS will enable Aqualectra to add more renewables to the power system, help smooth their intermittent nature and provide grid stability. According to Aqualectra's 2022 annual report, the last one available on its ...
