

Fortis Energy has announced the acquisition of a significant 180 MW (AC) solar project with an integrated Battery Energy Storage System (BESS) in Sremska Mitrovica, Serbia. This solar power plant, which will also feature a substantial energy storage system, is set to become one of the largest of its kind in Southeast Europe.

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems. This ambitious initiative will encompass areas in the cities of Zajecar and Leskovac, as well as the municipalities of Bujanovac, Lebane, Negotin, and Odzaci.

The Government of Serbia issued a decision to develop a special purpose spatial plan for a group of solar power plants of a total of 1 GW in connection capacity including battery energy storage systems of at least ...

From backup power to bill savings, home energy storage can deliver various benefits for homeowners with and without solar systems. And while new battery brands and models are hitting the market at a furious pace, ...

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems. This ambitious initiative will ...

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 GW that will be colocated with two-hour battery energy...

Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zajecar, and Bosnjace. Together, these sites will provide 1 GW of solar energy capacity. Each plant will also have advanced battery storage systems totaling 200 MW, ensuring stable electricity flow across the national grid.

The Government of Serbia issued a decision to develop a special purpose spatial plan for a group of solar power plants of a total of 1 GW in connection capacity including battery energy storage systems of at least 200 MW in operating power. Hyundai Engineering and UGT Renewables were selected as the strategic partner for the project.

Turkish renewables company Fortis Energy announced today the acquisition of a 180 MW solar project, coupled with a 36-MWh battery energy storage system (BESS), in Serbia. The solar farm will be located in the city of Sremska Mitrovica and construction works at the site are scheduled to begin in 2025, the company noted in a press statement.

The Serbian government is seeking a strategic partner to develop at least five PV plants with a cumulative capacity of 1 GW/1.2 GWdc and at least 200 MW/400 MWh of battery energy storage.

Fortis Energy has acquired a 180 MW solar project including a 36MWh battery energy storage system in Sremska Mitrovica, Serbia. The photovoltaic solar asset is "expected to be one of the largest solar power plant and energy storage system in the south-eastern Europe," a Fortis statement said.

This project marks Serbia's first strategic partnership in the renewable energy sector and stands as the largest solar and battery storage initiative in the country. The consortium behind the project includes UGT Renewables and Hyundai Engineering Co. Ltd, working in partnership with EPS and Serbia's Ministry of Mining and Energy.
