

Will the solar market fall in 2023?

End-user markets are booming while manufacturers struggle to make a profit. Installations this year will top 520GW. Yet again, forecasts for solar build have proven too conservative. China alone added 216.9GW (AC) or 268GW (DC) in 2023, 60% of the world market, and we do not expect it to fall.

Did Jigar Shah lend money to a solar company?

The Loan Programs Office, a government agency with authority to issue hundreds of billions in loans to promising energy projects and headed up by former solar entrepreneur Jigar Shah, didn't lend money to a PV manufacturer between the collapse of Solyndra in 2011 and August's loan to Qcells.

How many gigawatts of solar will Shandong add by 2025?

Shandong, an industrial hub south of Beijing, plans to add more than 11 gigawatts of offshore solar by 2025, with an ultimate aim of building 42 gigawatts of capacity.

Did China really want the solar industry?

"China really wanted the solar industry," says Hemlock's former president, Beachy. "We gave that away as a country." It's a tragic failure of vision and ambition. In Detroit a century ago, US automobile entrepreneurs created an industry that irrevocably transformed cities, countries and economies.

Is a new solar plant coming to Easley?

Recent renewable energy development in the region has already filled all available transmission capacity, said EDF, which has proposed a solar plant, called Sapphire, next to Intersect Power's proposed Easley plant.

Is Bloomberg a good company?

As a company, Bloomberg L.P. is also leading by example, including committing to 100% renewable energy by 2025 and taking action in the communities where its employees live and work.

With nearly 3,000 terawatt-hours of electricity produced, wind and solar accounted for a combined 10.5% of global 2021 generation, BNEF found in its annual Power Transition Trends report. Wind's contribution to the ...

More than 2,000 gigawatts of potential power--roughly twice the country's installed power plant capacity--are now on hold in queues around the country, according to the Lawrence Berkeley report.
