We are a team of dedicated professionals focused on providing customized renewable energy solutions that fit our customers' needs. As your partner, Bluestem Energy Solutions will get to know your unique situation and engineer the best strategy for you.

Bluestem is the developer, financier, and long-term owner and operator of each project we build. A PPA with Bluestem provides access to reliable, cost-effective electricity with no up-front capital required. Our in-house team of finance professionals manage all project funding and other financial aspects.

Bluestem Energy Solutions is a developer, owner, and operator of energy assets. Bluestem focuses on providing affordable, reliable, and sustainable solutions for our partners by identifying, developing, and implementing local energy solutions.

Bluestem Energy Solutions is an energy development company focused on identifying and implementing energy solutions for our customers. The Bluestem business model is focused around value-based solutions and helping to improve the long-term economics of our customers' electrical distribution services.

Bluestem Energy Solutions works to identify, develop, and implement local energy solutions for utilities. Their current vision originates from the first connection to the distribution system with a two turbine wind farm.

By using trusted, cutting-edge technology and making responsible design choices, Bluestem facilities result in reliable energy projects that maximize value to each utility. Empowering communities and serving our partners through innovative renewable energy solutions

Once completed, the facilities developed by Bluestem Energy Solutions and Sandhills Energy will power thousands of homes when power is most needed. USDA Pace Program funding has proven essential to providing these Midwest communities with access to clean, renewable energy.
