

What's going on with Bolivia's largely untapped lithium reserves?

Sources In a significant move towards the development of Bolivia's largely untapped lithium reserves, Chinese battery giant CATL has confirmed a \$1.4 billion investment. The deal, which was cemented on Sunday, is a continuation of a partnership with the Bolivian government that was established in January.

Does Bolivia have a lithium plant?

This follows a deal between Bolivia's state-run lithium company, Yacimientos del Litio Bolivianos (YLB), and a Chinese consortium. CATL agreed to invest over \$1 billion in the project's first stage for rights to develop the two lithium plants. Despite being a global leader in electric vehicle batteries, CATL does not currently produce any lithium.

Can China develop EV batteries in Bolivia?

A giant Chinese battery company, Catl, has won a bidding process to develop Bolivia's huge lithium reserves. The ultra-light metal is used in electric vehicle (EV) batteries, production of which is expected to soar as fossil fuels are phased out.

Will Bolivia build a lithium plant in the salt flats?

The agreement focuses on Bolivia's salt flats, known for their vast lithium resources. Bolivian President Luis Arce confirmed the plan to build two lithium plants in the country's Uyuni and Oruro salt flats after meeting with CATL executives. He announced a \$1.4 billion investment and hinted at possible future investments up to 2028.

How much lithium can Bolivia extract a year?

This year Bolivia signed a deal with a Russian company called Uranium One to build a plant designed to extract 14,000 tonnes of lithium per year. It also signed a contract with a subsidiary of the Chinese company CATL -- the world's largest battery manufacturer -- to set up two lithium extraction sites with a joint capacity of 35,000 tonnes a year.

What is the price of lithium in Bolivia?

The price of battery-grade lithium reached close to \$85,000 a tonne toward the end of 2022. Energy minister Franklin Molina said the move showed there were "sovereign alternatives to the privatization models of lithium exploitation." Bolivia state firm YLB is set to supervise and take a central role in the project.

AUSTIN, TEXAS - EnergyX has successfully deployed the first of three LiTAS(TM) pilot plants, a containerized direct lithium extraction (DLE) unit, for operation at Bolivia's Salar de Uyuni, the largest lithium resource in the world.

The University of Warwick is set to help Bolivia become a world leader in renewable energies and electric

vehicles, thanks to a historic partnership on lithium battery research with the Bolivian Government.

Bolivia has chosen a consortium including Chinese battery giant CATL to help develop the South American country's huge, but largely untapped, reserves of lithium after a lengthy bidding...

Chinese battery giant CATL confirmed a \$1.4 billion investment to help develop Bolivia's huge but largely untapped reserves of lithium, cementing on Sunday a partnership with the government...

Bolivia is cutting the ribbon on its first industrial-scale lithium plant, the dawn of what it hopes will be an export boom of the battery metal that could bring it back from the brink of...

The government will take a 51% stake in the project, to be located in the Uyuni salt flat in southwest Bolivia, within the so-called lithium triangle shared with Chile and Argentina.

Bolivia, home to the world's largest lithium resources, is set for a major shift. Chinese battery giant CATL, a global leader in electric vehicle batteries, has confirmed a \$1.4 billion investment. This investment aims to develop Bolivia's untapped lithium reserves and marks a new phase in the CATL-Bolivia partnership.

Bolivia cut the ribbon on its first industrial-scale lithium plant, the dawn of what it hopes will be an export boom of the battery metal that could bring it back from the brink of ...

LA PAZ, Bolivia (AP) -- The total of Bolivia's confirmed lithium resources has increased 2 million tons to 23 million tons, the Andean country's president said Thursday. The new estimate further cements Bolivia's position as the country with the world's biggest known deposits of lithium, which is in high demand for use in batteries.

The agreement could help finally unlock Bolivia's huge potential as a supplier of lithium for batteries needed to power the global shift to electric vehicle, although projects to mine the ...

4 ???&#0183; In 2023 Bolivia produced 948 tonnes of lithium carbonate, a white salt that is a precursor to the compounds used in lithium-ion batteries, according to the Mining Ministry. ... the world's largest ...

For Bolivia, the primary one lies in balancing the significant economic opportunity that lithium-ion battery production represents with its impact on various local and international social groups, or vice versa: the impact these social groups represent in ...

5 ???&#0183; In 2023 Bolivia produced 948 tonnes of lithium carbonate, a white salt that is a precursor to the compounds used in lithium-ion batteries, according to the Mining Ministry. ...
