Due to the complex political system in Bosnia and Herzegovina, the rapid adoption of regulatory frameworks providing clear guidance for the development of AI is not expected. However, given Bosnia and Herzegovina's recent approach to negotiations with the EU, alignment of the legislative framework with EU directives is anticipated.

Bosnia and Herzegovina continues to grapple with the enduring impact of landmines and ERWs resulting from the early 1990s conflict. Throughout the extensive post-conflict recovery period, this contamination has hindered the secure repatriation of displaced individuals and the reconstruction of the country's devastated infrastructure.

Mineral exploration company Adriatic Metals is planning to start production at its Vares Silver Project in central Bosnia in November 2023, reported Reuters, citing the company's CEO, Paul Cronin. Covering a 41km² concession area, the Vares silver project is located in the Vares municipality of the Zenica-Doboj Canton in Bosnia and Herzegovina.

More than twenty-five years after the end of the war, Bosnia and Herzegovina remains the most heavily mined country in Europe, also contaminated with explosive remnants of war. An estimated 175,000 mines and unexploded ordinances threaten the safety of 545.000 children, women and men (15% of the country's population). Since 1995, 620 lives ...
