

Where is Bouvet Island?

Bouvet Island (/ˈbuːveɪ /BOO-vay; Norwegian: Bouvetøya [buˈvøːə]) is an uninhabited island and dependency of Norway. It is a protected nature reserve. It is a subantarctic volcanic island, situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, and is the world's most remote island.

Why is Bouvet Island a remote island?

This uninhabited volcanic island in Antarctica is almost entirely covered by glaciers, making it difficult to approach. Bouvet Island is recognized as the most remote island on Earth because it is furthest from any other point of land (1,639 km from Antarctica).

Is Bouvet Island the loneliest place on Earth?

For a place known as "the loneliest place on earth," a surprising number of people have tried to claim it. An uninhabited frozen isle halfway between South Africa and Antarctica, Bouvet Island is the most remote island in the world, and as such, perhaps the most remote landmass in the world.

How big is Bouvet Island?

Landing is extremely difficult on the island. It has an area of 23 square miles (59 square km), rises to 3,068 feet (935 metres), and is uninhabited. Bouvet Island was discovered in 1739 by the French navigator Jean-Baptiste-Charles Bouvet de Lozier (1705-86), for whom it is named.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south,; 58 and Gough Island, 1,845 km (1,146 mi) to the north.

How did Bouvet Island get its name?

At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency. In 1971, it was designated a nature reserve.

Bouvet Island, islet in the South Atlantic Ocean. One of the world's most isolated islands, it lies about 1,500 miles (2,400 km) southwest of the Cape of Good Hope of southern Africa and about 1,000 miles (1,600 km) north of the mainland of ...
