

What makes lithos unique?

In nearly a decade of lithium-ion battery technology innovation, Lithos has established itself as the global leader in high performance battery systems engineered for demanding use. Our proprietary battery technology innovation gives clients step-leaping customization that can take products to market faster with ultimate modular compatibility.

Where are lithos batteries made?

Made in California. Built Purpose Tough. Exceptional Battery Technology from World-Class Engineers. In nearly a decade of lithium-ion battery technology innovation, Lithos has established itself as the global leader in high performance battery systems engineered for demanding use.

What makes lithos a great battery company?

Founded by highly regarded alumni from MIT and Tesla, Lithos is proud of its unwavering commitment to engineering excellence. The company's world-class team is dedicated to pioneering battery innovation and providing exceptional customer service.

Who uses lithos technology?

Our innovative technology enables industry-leading power and energy density- with hallmark Lithos application-specific dependability and safety. Industries served include automotive, e-mobility, marine, off-highway, energy storage, defense, construction, mining, and agriculture.

How much energy does Brazil use?

In 2013, the Southeast used about 50% of the load of the National Integrated System (SIN), being the main energy consuming region in the country. The region's installed electricity generation capacity totaled almost 42,500 MW, which represented about a third of Brazil's generation capacity.

What's new in Brazil's energy bill?

Brazil's Senate approved a wide-ranging energy bill on Thursday that establishes a regulatory framework for offshore wind energy projects while including unrelated amendments promoting polluting energy sources like coal and natural gas.

In 2020, Brazil derived roughly one third of its total energy supply from oil, and another third from biofuels. Access to electricity across the country is almost universal, making Brazil's energy sector one of the least carbon-intensive in the world.

The Latin America Energy Outlook, the International Energy Agency's first in-depth and comprehensive assessment of Latin America and the Caribbean, builds on decades of collaboration with partners support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides

insights on the ways in which the ...

Lithos" novel battery systems are custom engineered, by application, for eight core industries, including: automotive, marine, off-highway, energy storage, defense, construction, mining, and...

Since 2015, Lithos has solidified its position as a world leading manufacturer of high-performance lithium-ion battery systems engineered for the most demanding environments. Founded by highly regarded alumni from MIT ...
