Brookfield has agreed terms for long-term power purchase agreements with corporate customers for the initial 510 MW portfolio. SunEnergy1's portfolio is strategically focused in the PJM power market, which is seeing rapidly growing corporate demand for renewable power driven by data center load growth and a scarce supply of clean energy projects.

In 2022, we acquired clean power developer, Urban Grid, and its pipeline of approximately 20,000 megawatts of utility-scale solar and energy storage capacity across the United States. The business came with significant track record and expertise in the full solar development process, from site acquisition through to interconnection, permitting ...

The report released today examines provisions of U.S. law that allow some measure of support for Cuba's energy transition and recommends steps that the U.S. government could take to support the transition, improving daily life for the Cuban people while at the same time providing opportunities for the renewable energy sector in the United States.

Cuba's energy sector is at a crossroads. The country's mostly fossil fuel-fired energy system faces a number of longstanding and serious challenges, including breakdowns at aging power plants, decreasing fuel imports and fuel shortages, and the growing threat of climate change-related disruptions.

In 2022, we acquired clean power developer, Urban Grid, and its pipeline of approximately 20,000 megawatts of utility-scale solar and energy storage capacity across the United States. The business came with significant track ...

The new entity is the primary vehicle through which Brookfield acquires and operates renewable energy assets, with initial assets, and development projects in Canada, the US, and Brazil. The transaction closed on November 30, 2011.

Our renewable energy assets generate 5.2 GW of installed capacity, and we own a growing solar portfolio. Our private equity portfolio is diverse, including water sanitation, fleet management and residential real estate development.
