

Will Brunei build a solar power plant in 2022?

Construction of the solar power plant is slated to start in 2022, with \$50,000 earmarked to conduct a land survey in Kg Sg Akar. Both the Bukit Panggal and Belingus solar farms will produce 15 MW of solar energy. Apart from the three new solar power plants, Brunei will expand its solar energy project in Seria from 1.2 MW to 4.2 MW.

Does Brunei have a solar city?

Brunei also intended to build the Temburong Smart City, which would mostly rely on solar energy and be dubbed the "Green Jewel of Brunei." However, Brunei has only put in 1.2 MW of solar as of now as a demonstration project. It's reasonable to assume that the implementation of renewable energy is still in its infancy.

Is Brunei a sustainable country?

The Brunei government has pledged to enhance renewable energy, particularly solar PV, in order to assure the growth of sustainable energy. Brunei also intended to build the Temburong Smart City, which would mostly rely on solar energy and be dubbed the "Green Jewel of Brunei."

Can Brunei achieve 200 MWp of solar energy by 2025?

The Sultanate also targets achieving at least 200 MWp of solar energy capacity by 2025. This project also supports the Brunei Climate Change Secretariat's strategies to increase renewable energy adoption and reduce carbon emissions.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

How will solar power benefit Brunei?

The solar power generated is equivalent to the electricity consumption of approximately 600 households per year and will offset some of the power used by the BSP Head Office. On a national level, the power generated will contribute towards Brunei's target of producing 100MWp renewable energy by 2025.

The project aligns with Brunei's renewable energy goals, targeting a 30 per cent share of renewables and at least 200 MWp solar capacity by 2025. Additionally, Project SINAR supports the Brunei Climate Change Secretariat's efforts to increase renewable energy adoption and cut carbon emissions.

The Brunei government has pledged to enhance renewable energy, particularly solar PV, in order to assure the growth of sustainable energy. Brunei also intended to build the Temburong Smart City, which would mostly

rely on solar energy and be dubbed the "Green Jewel of Brunei."

The Kg Sungai Akar solar farm -- located at the former Kg Sungai Akar landfill -- is expected to be the largest thus far, generating 30 MW of solar energy. Construction of the solar power plant is slated to start in 2022, ...
