

Bulgaria's Ministry of Energy has launched two tenders to add 1,425MW of renewable power generation to the grid and 350MW of battery energy storage system (BESS) projects. The ministry said the main objective of the investment, totalling BGN535.1 million (US\$298.2 million), is to increase the share of clean energy in Bulgaria by supporting ...

The Renalfa IPP project in Razlog has been claimed as the biggest project of its type in Bulgaria. It is also larger than the biggest project to come online so far in neighbouring ...

Hithium has launched a 55 megawatt hours (MWh) battery energy storage system (BESS) project in Razlog, southwestern Bulgaria. The project, the largest in Eastern Europe, has been realised by Solarpro, a company specialising in energy generation and storage solutions across Europe.

Vienna-based developer Renalfa IPP has started commercial operation at its 25 MW/55 MWh battery energy storage system (BESS) located in the city of Razlog, southwestern Bulgaria. The system, which is connected to ...

The 25 MW / 55 MWh utility-scale battery energy storage system (BESS) located in Razlog Municipality, Southwestern Bulgaria commenced commercial operations. This significant milestone marks the ...

Bulgaria, Italy, and Hungary offer the highest profit potential for energy arbitrage in Europe in terms of average spot market revenue in 2023, ... In the report, Rystad ranked countries by the opportunities for arbitrage profits ...

Rystad Energy has estimated that the potential profits for electricity arbitrage with battery storage in Bulgaria are the highest in Europe. The activity involves charging batteries when power prices are low and discharging ...

Stationary battery manufacturer Hithium has successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe to date, with a capacity of 55MWh. This solar plus storage project was realized completely by EPC company Solarpro, in Razlog, Southwestern Bulgaria, where the project is located.

The 25 MW - 55 MWh facility in the town of Razlog in southwest Bulgaria is colocated with a 33 MW photovoltaic plant. Just half a year after the announcement of the deal, one of the first larger battery energy ...

Bulgaria has called for applications in a tender process for about 3 GWh of energy storage capacity in the country. The scheme was announced earlier in June this year. ... (RESTORE), the country's Ministry of

Energy is seeking battery energy storage system (BESS) capacities that can be operationalized before March 2026. The scheme is also part ...

Stationary battery manufacturer Hithium and solar project EPC provider Solarpro have announced a strategic partnership, with their first project to come in Bulgaria. Hithium has agreed to supply the battery products to a 55 MWh energy storage project, for which Solarpro is providing turnkey EPC services.

Stationary battery manufacturer Hithium and solar project EPC provider Solarpro have announced a strategic partnership, with their first project to come in Bulgaria. Hithium has agreed to supply the battery products to a 55 ...

Energy storage arbitrage, which involves charging batteries when power prices are low and discharging them during peak demand periods, is a promising avenue for battery storage operators to generate revenue and ...

Renalfa IPP started commercial operation of its first utility scale 25MW/55 MWh Battery Energy Storage System (BESS) at the beginning of June. The BESS is Bulgaria's southwestern city of Razlog. It is connected to the TSO grid and co-located with a 33 MWp PV plant. The BESS enables the time shift of the solar peak production and arbitration on ...

Lithium-ion battery manufacturer Hithium will provide 55MWh of battery products for a solar-plus-storage project being built by EPC firm SolarPro in Bulgaria. China-based Hithium will provide the battery energy storage system (BESS) technology to SolarPro for the project in the southwest town of Razlog, Bulgaria, which also features 33MWp of ...

Energy storage arbitrage, which involves charging batteries when power prices are low and discharging them during peak demand periods, is a promising avenue for battery storage operators to generate revenue and profits, and Bulgaria's market has the highest potential of all European countries.
