Bulgaria cost of a solar system for a house

How much does electricity cost in Bulgaria?

In the beginning of 2022,the average price of electricity in Bulgaria amounts to EUR 131.95 per megawatt,whereas in July last year it was to the tune of EUR 95 per megawatt. However,between July 2021 and January 2022,the price of electricity has fluctuated and at times,it exceeded EUR 300 per megawatt.

What services do we offer in the construction of solar installations?

We offer a whole range of services related to the construction of solar installations - from research and evaluation to installation,maintenance and service. We strive to provide high-quality alternative energy solutions tailored to the needs of our customers.

Why should you install a solar system?

The installed PV system guarantees its owner independence and full control over his electricity costs. In most European countries,solar energy is purchased from electricity suppliers,which allows you to receive money from your solar installation. Solar installations recorded 91% lower CO2 emissions from natural gas and 96% less than coal.

The (initial) installation cost for a single-family house is about 12,500 euros. If the household pays up to 25 euros per month in electricity bills, I don"t think it makes sense to have solar panels.

The cost of this powerful hybrid PV system in 2021 was 115 590 lv (59 100 EUR) with delivery, installation, commissioning and VAT. This is comparable to the price of a compact crossover like Audi Q3 or Mercedes GLB in medium configuration with a diesel engine.
