

Is Bulgaria relying on battery technology & energy storage?

A South African investor opened a battery factory in Rousse last year Bulgaria is relying heavily on battery technology and energy storage overall in its energy transition. Belgian company ABEE launched a EUR 1.1 billion project in December for a battery plant, recycling facility and a research and development center.

What are Bulgaria's energy storage subsidies?

The subsidies are for battery systems required to be installed together with renewable electricity plants of at least 200 kW in capacity. Following a three-month delay, the Ministry of Energy of Bulgaria combined five planned procedures for grants for energy storage facilities into three and launched calls for two of them.

Should Bulgaria Invest in solar energy?

This approach risks saddling the country with outdated infrastructure as well as an increasingly uncompetitive energy system. It is now economic for commercial and industrial customers in Bulgaria to invest in solar PV projects, without subsidies and without government incentives.

How much money does Bulgaria earmark for battery systems?

Bulgaria earmarked EUR 273 million in subsidies for battery systems required to be installed together with renewable electricity plants.

How much solar power does Bulgaria have?

Moreover, estimates from the Bulgarian Association for Production, Storage, and Trading of Electricity (APSTE) indicate that Bulgaria has tripled its installed solar capacity since 2020, with a projected annual growth of 450 to 750 MW over the next three to four years.

Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic

the sustained reduction in prices for both solar PV and storage systems is now leading many C& I business owners to invest in assets Behind-the-Meter (BtM). Here, energy storage systems can shield consumers from high energy prices by

The Plan designates a sum amounting to 878 mln. lev for cofunding solar projects, including auxiliary battery storage. The goal is to increase the country's energy capacity by at least 1.4 GW. The funding is ...

Ongoing technological advancements, coupled with decreasing prices of PV modules, position Bulgarian PV for significant success. Achieving the 1 GW target for new solar capacity on the grid in 2023 and bringing the

total PV fleet close to 3 GW puts Bulgaria on track to fulfill its 3.2 GW NECP targets for 2030 seven years ahead of schedule.

The EWRC has determined the estimated market price (i.e. reference price) for producers of electricity from solar energy to be BGN 141.49//MWh. Based on the reference price, this Decision enables the EWRC to determine the premiums that producers receive from the Electricity System Security Fund (ESSF) as a top-up up to the respective FiT. The ...

It is now economic for commercial and industrial customers in Bulgaria to invest in solar PV projects, without subsidies and without government incentives. As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market

The EWRC has determined the estimated market price (i.e. reference price) for producers of electricity from solar energy to be BGN 141.49//MWh. Based on the reference price, this Decision enables the EWRC ...

Several large scale solar photovoltaic (PV) projects with a capacity above 50 MW have been announced in Bulgaria after 2018 and these projects will be built between 2022 and 2024. The report provides a complete picture of the market situation, dynamics, current ...

Currently, Bulgaria's electricity market offers an opportunity for EUR110 (\$122) per MWh profit on battery energy storage with two hours of discharge capacity using energy arbitrage. Rystad Energy 's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh.

Investors have until June 12 to apply for grants for energy storage investments in Bulgaria of EUR 273 million within two calls. The subsidies are for battery systems required ...
