

Does Bulgaria have a solar power plant?

In April 2023 Bulgaria's Inercom signed contract with Huasun for supply of 1.5GW solar modules. Solar power in Bulgaria has expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/kWh in a fixed rate 20 year power purchase agreement.

Does Bulgaria support small-scale solar PV projects?

Recently, the Energy Act and Spatial Development Act (SDA) in Bulgaria were reviewed to support small-scale solar PV projects. The latest changes apply to rooftop and facade photovoltaic installations up to 1 MW. These small-scale projects were freed from certain obligations during the planning and permit stages.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

What is solar power & how does it work in Bulgaria?

Solar power allows for a wide range of applications - from residential, through commercial to utility scale. Government policy and legislation aim to support investors in all types of photovoltaic projects. The support schemes in Bulgaria include premium contracts and a feed-in tariff scheme.

What percentage of Bulgaria's electricity is generated by solar power?

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity generation.

Why is the market for distributed solar PV growing in Bulgaria?

As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market is occurring despite the lack of a clear policy and regulatory framework, and in spite of the presence of many administrative and tax-related barriers.

Bulgarian photovoltaic association is a non-profit organization unifying more than 400 companies from the renewable energy sector in Bulgaria. Our members are companies with different profile - producers of solar panels, ...

Bulgarian photovoltaic association is a non-profit organization unifying more than 400 companies from the renewable energy sector in Bulgaria. Our members are companies with different profile - producers of solar

panels, designers, installers, investors in the construction of photovoltaic power plants, project developers, financial institutions ...

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity generation. However, long-term share of solar power is much lower. Director o...

Solar potential in Bulgaria. Solar power generated 12% of Bulgaria's electricity in 2023. [1] By the end of 2020 about 1 GW of solar PV had been installed. [2] It has been estimated that there is potential for at least another 4 GW by 2030. [3] On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity generation.

Photovoltaic energy in Bulgaria. In Bulgaria, the photovoltaic installed capacity is set to triple by 2030. Solar PV will drive the RES sector, projected to grow to 27% of gross energy consumption by 2030. As part of the ambitious EU target of 32% share for renewables, Bulgaria is updating its policy to promote investments.

It is now economic for commercial and industrial customers in Bulgaria to invest in solar PV projects, without subsidies and without government incentives. As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market
