SOL! Burundi propose des services et produits solaires pour particuliers, professionnels, ONG, Communaut&#233;s... Nous travaillons avec les normes internationales et des partenaires reconnus pour assurer un service de qualit&#233;. Notre objectif est de fournir de l'&#233;nergie solaire pour tous nos clients, tout en am&#233;liorant leur empreinte carbone.

A pioneering 7.5MW solar PV plant has reached commercial operation in Burundi, increasing the country's generation capacity by over 10%. It's the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses.

Green energy developer Gigawatt Global has led an international effort in a six-year process to build Burundi's first solar farm, consisting of a 7.5 MW solar PV plant located near the village of Mubuga.

Burundi's first utility-scale power development to come online in over three decades started up in October. The 7.5MW Mubuga solar PV plant will boost the country's on-grid generation capacity by just over 10%, according to African Energy Live Data.

The pioneering 7.5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses - just before the start of COP26.

The pioneering 7.5MW solar PV plant has increased Burundi's generation capacity by over 10% and is the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses - just before the start of COP26.

lets you input basic data like Location of your system, Load profile and annual energy consumption, PV module data (manufacturer, model, orientation, quantity etc.), ...

Burundi's on-grid solar market is in its nascent stages, with around 9 MW of installed solar PV capacity as of 2023. The government is actively promoting solar energy through initiatives like the National Electrification Strategy, aiming to increase access to electricity, particularly in rural areas.
