

Buying and selling of used photovoltaic panels

Can I buy second-hand solar panels?

There are two options for buying second-hand solar panels: used or refurbished products. As you now know, used solar panels were previously owned by a consumer or business. Refurbished solar panels are used solar panels that have been restored to an acceptable condition or standard by a refurbishing company or the manufacturer.

Should you buy used or refurbished solar panels?

When you consider buying used solar panels, there are used or refurbished options. Used ones have had previous owners, which could be a homeowner or business. Then refurbished solar panels have good condition by a fix-up crew or the original maker.

Why should you sell a solar panel?

Understanding the reason for selling can provide a glimpse into the overall condition of the solar panel. For instance, if the reason to sell the product is to switch to a more robust panel, chances are the product is in good condition.

Can you get a loan to buy a solar panel?

While financing options may be more limited, personal loans or home equity loans could be used to fund a used solar panel purchase. With a background in engineering and a passion for sustainability, ABC is your go-to source for all things solar.

What should I look for when buying used solar panels?

When buying used solar panels, thorough evaluation is crucial. Here's what to look for: Solar panels typically degrade by about 0.5-1% per year. A 10-year-old panel might have 90-95% of its original efficiency. Ask for the panel's age and, if possible, its performance history. Look for cracks, discoloration, or frame damage.

Do refurbished solar panels come with a warranty?

Refurbished: Some refurbished solar panels come with a refurbished warranty. These warranties have shorter coverage periods than new solar panels. Refurbished solar panel warranties range from three months to nine years. Some refurbished panels don't come with a warranty at all.
