What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.

Who produces electricity in Cape Verde?

Electra serves all islands of Cape Verde except Boa Vista, where electricity and water are produced and distributed by the public-private company 'guas e Energia de Boavista. Other smaller electricity producers are Cabeolica, which operates four wind parks, 'guas de Ponta Preta on the island of Sal, and Electric Wind on Santo Ant o.

Does Cape Verde have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cape Verde: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

The Cape Verde government has signed a contract with the domestic partly state-owned wind power operator, Cabeolica, to support its wind farm expansion and battery installation projects in the archipelago nation off ...

In 2022, the Government of Cabo Verde signed an agreement with Cabeolica to install three more wind power turbines with a capacity of 4.5MW each, representing a total additional capacity of 13MW.
