The United States joined leaders from the Royal Government of Cambodia; the Governments of the United Kingdom, Australia, Switzerland, and Singapore; InfraCo Asia; and Khmer Cold Chain (KCC) to celebrate the official opening of KCC's 6,046 cubic meter cold storage cross-docking facility in Phnom Penh Autonomous Port.

An assessment indicated that Cambodia's cold storage capacity needs to expand by 140,000 cubic meters by 2030 to meet supply chain demands. This facility is a crucial step towards meeting that goal and strengthening Cambodia's position in the global agricultural and logistics market.

It absorbs heat in the cold storage to reduce the temperature in the storage, realizing the refrigerated preservation of chicken. It can evenly distribute the cooling capacity to make the temperature in the cold storage uniform, avoiding the impact of local temperature differences on the quality of chicken.

The storage and retrieval system is automated and expandable so your mill can do more work with the same number of employees. Overload and overspeed protection, crane motion limits, emergency stops; Programmable storage ...
